A Business Ste lement.

San Francisco; Nov. 10.—The Bulletin this aftermoon will publish a series of interviews with representative business men and all branel escot frade setting forth the general collision of mercantile straigs. It shows that within the last 18 months therefore been a growth of train, no of the nature of a boom, but of steady, wealthy and legitimate growth. This has been particularly noticeable within the present season, especially with regard to the interior trace. One indication of the prosperity of the interior is that up country dealers instead of asking long time, are now discounting their cred sand anticipating the maturity of their obligato is. The opinion of gentlemon interviewed is to the general effect that the increasing prespectly is due to a restoration of confidence in the community, good crops, and cessation of mining stock specialision, which has caused the diversion of large amounts into legit mate business channels. The article clearly shows a second of the city and state. A Business Statement
